Field of the Invention The invention pertains generally to the field of medicine and particularly to the field of vascular structures. The invention pertains more particularly to a medical device for manual repair of a blood vessel severed as a result of a surgical procedure, and may be used in tandem with a suture.

2. Description of the Related Art During a surgical procedure, the vessel may be severed or otherwise damaged by the surgical procedure. The resulting damage may impair or preclude flow of blood through the vessel for a period of time. There is a need for a medical device that may be used by a physician or nurse to manually repair the damaged portion of the vessel.The 'Spitting Image' presenter came under fire last year for his treatment of co-presenter

Play the Woodwinds on the Hit Sing Out Recorded by RON KENOLY.[CH-Indonesia-Korea "problems" in interdisciplinary medical planning: "reflexology" of tuberculosis in Indonesia]. The introduction of MDT (Multi-drug therapy) was a major achievement of WHO's global TB control programme. This paper shows that the availability of MDT in Indonesia, however, remains a problem. In 1999, a study on drug susceptibility of TB suggested that some TB strains were still resistant to some drugs and this caused a particular problem in Indonesia. Reports from Indonesia show that some TB patients still use alternative medicine (AM). One of them is the traditional "reflexology" which aims to cure TB. Some studies suggest that AM may be promising in the management of diseases such as TB, and therefore needs to be included in the MDT. The article shows that the Indonesian Ministry of Health had begun to consider, in 1994, interdisciplinary medical planning which can include AM. However, such planning could not be implemented because of lack of manpower and resources. The paper suggests that there is a need to increase manpower and resources for interdisciplinary medical planning.Effect of high-order aberrations on the quality of wavefront-guided laser surgery in eyes with long axial lengths and high refractive errors 754eb5d184
