Auto Shutdown Pro II

Auto Shutdown Pro II provides you with a very powerful and innovative software allowing you to quickly stop, resume, restart, lock, sleep, hibernate or shutdown your computer and its various options. With one click you can quickly trigger the shutdown, reboot, sleep or auto-shutdown of your computer. The software has been created to give you the opportunity to automate the power off of your computer at a particular time as you wish, depending on the best power mode of your choice. When you click on the system tray icon, you can easily perform power off tasks: you can shut the computer down, restart it, log off, suspend it or make it hibernate. You may also manage your tasks or remove them directly from the windows task bar. All tasks can be recorded in a log file and you may view it from time to time. Thus, you can analyze past events or modify them and schedule a new one. The software can automatically continue an interrupted task in case of power loss. Once created, a task is fully editable allowing you to specify how it is executed. Thus, you may open any program, file, URL or display a message. You can also access a FTP server configuration center providing several useful options. You may for instance create an FTP server, edit the information of an existing FTP server, change its password or transfer files. Auto Shutdown Pro II contains a file compression tool (zipping) and its operation is fully integrated into the software. As you start, the application will display a verification message asking whether you really want to enable the power options. Once you confirm you want to set the power options, you can configure the shutdown time, the computer mode, what your choice is, what option you want to set and how often you want a confirmation message. The software also enables you to turn off the computer monitor, whenever you want to. You can also enable or disable this feature at any time and choose the duration of each interval. Automate Shutdown Pro II Review Auto Shutdown Pro II works very well and will help you start, stop, restart, lock, suspend and shutdown your computer or any other device at a certain time or schedule, depending on your choice. The software has a very well designed interface and is very easy to use. Additionally, the software has a well-thought-out log file and user manual which explains how to use the program. I found that the application runs quite quietly in the background and does not slow down your computer

What's New in the?
